

Team 1280 Sponsorship Packet

ABOUT US

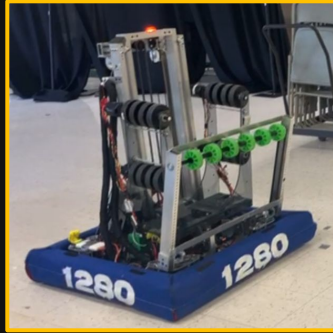

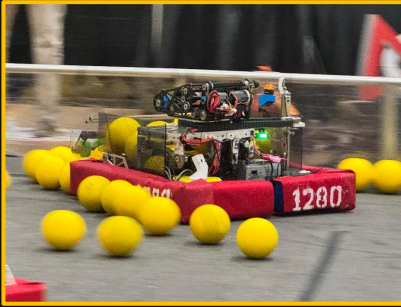

Founded in 2004 by a group of San Ramon Valley High School (SRVHS) students, Team 1280 began as an independent effort without direct ties to the school. Over time, the team's dedication and success earned the support of the SRVHS administration. Today, Team 1280 operates out of the SRVHS auto shop, where our machines, tools, and materials are housed. In accordance with school policy, our coaches are members of the SRVHS faculty.

Team 1280 competes in the FIRST Robotics Competition (FRC) and has earned multiple blue banners, including our most recent win at the 2020 Monterey Bay Regional.

Our members are not only committed to robotics but also to academic excellence. Many take multiple Advanced Placement (AP) courses and maintain high grades. The team is also proud to have a level of diversity that exceeds the demographic makeup of SRVHS, fostering an inclusive and collaborative environment for all.

WHAT IS FIRST ROBOTICS?

FIRST (For Inspiration and Recognition of Science and Technology) is a global nonprofit organization that inspires students to pursue STEM through hands-on robotics programs. Founded in 1989, FIRST creates opportunities for students to learn engineering, technology, and leadership.

Students gain hands-on experience in mechanical engineering, programming, electronics, business, and leadership. For many, FRC is their first step toward a career in STEM.

Each team works to create a fully functional 5ft, 115lb robot in just 8 weeks, participating in competitions each year, which occur from a regional to a global level. Each year has a different unique game design by FIRST, built for ingenuity, strategy, and teamwork.

93,000

countries

5,400

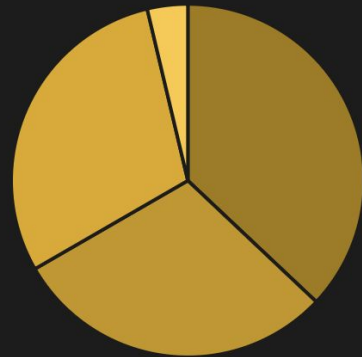

events in 2024/25 season

WHY SPONSOR OUR TEAM?

Your support helps us acquire essential resources to build the robot, cover registration and travel fees, and fund our outreach initiatives. Below is where your contribution goes — a specific dollar-amount breakdown for this season is still being finalized and will be shared on request.

- Robot Parts & Materials - \$10,000
- Competition/Travel Fees - \$8,000
- Tools & Shop Equipment - \$8,000
- Outreach Programs - \$1000

WHAT YOU GET IN RETURN

01

Visibility at regional competitions in front of thousands of students, parents, and professionals

02

Bring in talented students and recent graduates who are ready for employment

03

Boost your company's image as one who gives back to the community

04

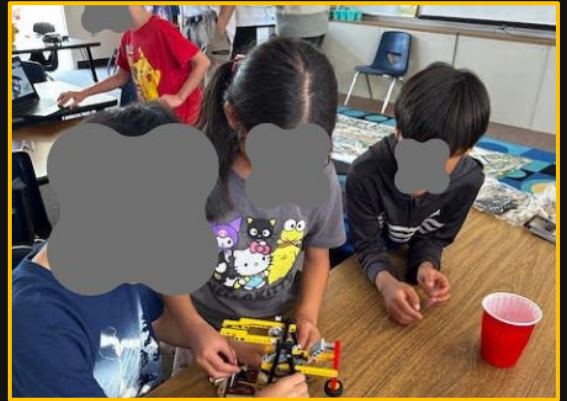

Get more students excited about STEM, increasing their chances of pursuing it later

We believe in spreading STEM awareness at every level of our community. Through hands-on workshops and showcases, we work to inspire the next generation of engineers, designers, and problem-solvers right here in Danville.

COMMUNITY

FLL Teams

Supporting FIRST LEGO League teams (elementary school level) across the Danville area to introduce younger students to robotics.

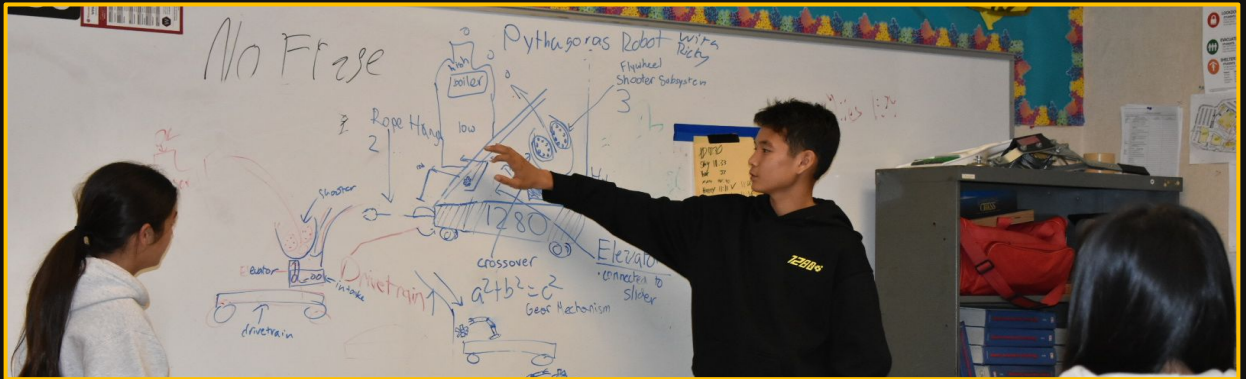

Science Nights

Show off our robot and what we do to younger students to instill early interest in engineering and robotics.

BEHIND THE BUILD
